### The Six Biggest Blockchain Trends Everyone Should Know About In 2021

Sur *Forbes* le 12 mars 2021

Blockchain has been one of the most talked-about tech trends of the last few years. As with many other trends that were important before the pandemic hit, it didn't make as many headlines in 2021 as it has done previously. But development has been ongoing and the year saw continued adoption of the technology throughout many industries and sectors. The simplest way to think about blockchain is... [Lire la suite](#)

### Vaultie Launches Verifiable Digital-ID Based Notary Seal on Blockchain

Sur *FinanzNachrichten.de* le 9 mars 2021

Using Vaultie's digital seal, notaries and commissioners are verified, as are the government ID and biometrics of the client signing the document. This means that anyone who may need to validate the authenticity of a document can check by simply scanning the document with their phone. Vaultie encrypts the documents between signing parties so no one can read the documents without explicit permission. In addition... [Lire la suite](#)

### JCB and Keychain Create Blockchain-based Micropayment Solution for IoT

Sur *FinanzNachrichten.de* le 12 févr. 2021

As new networks, such as 5G, deploy and the use of Internet of Things (IoT) devices grows, so will the need for automated and machine-to-machine micropayments. Mobile payment apps enabled the common mobile user to pay with their phone, however the current payment infrastructure does not support tens of billions of IoT devices. JCB and Keychain have begun solving these challenges by implementing a new blockchain and distributed ledger-based payment infrastructure that mitigates the risks of IoT micropayments...

### COMMENTARY: How blockchain can help the world improve quality of life for people globally means investing in education

Sur *Global News* le 24 janv. 2021

Improving quality of life for people globally means investing in education. By 2025, more than 100 million learners are estimated to be capable of higher education but won't have access to it either because they cannot afford the costs, or because courses aren't available in their region. Courses aren't available because communities or institutions lack the technological infrastructure, lack... [Lire la suite](#)
