NFT'S (NON-FUNGIBLE TOKENS) EDITION

This edition presents a selection of news and reports related to NFT and future challenges.

OpenSea's Monthly NFT Trade Volume Exceeds \$3.5 Billion in New All-Time High

Par Radhika Parashar sur [Gadgets.ndtv.com](https://gadgets.ndtv.com) le 18 janv. 2022

OpenSea, which claims to be the world's biggest online marketplace for non-fungible tokens (NFTs), has set a new record in sales volume, indicating the rising craze for NFTs. While still in the middle of January, monthly sales on the platform have already surpassed \$3.5 billion (roughly Rs. 26,038 crore) for the first time ever. The trading volume was calculated in the Ether (ETH) cryptocurrency.... [Lire la suite](#)

The NFT Market Report

Sur [Go.chainalysis.com](https://go.chainalysis.com) le 17 janv. 2022

Available Now! NFTs have exploded in 2021, with tens of billions of dollars' worth of cryptocurrency invested in the asset class this year. But what kinds of traders are driving this activity? What platforms are they using? And what kinds of returns are they getting? These are the questions we seek to answer in our latest report analyzing the NFT market. Inside, you'll find data and research... [Lire la suite](#)

An NFT collection of 10,000 Wall Street bulls sold out in 32 minutes, and soon risk-hungry collectors can double down or lose it all through a new gamification feature

Sur [Markets.businessinsider.com](https://markets.businessinsider.com) le 9 janv. 2022

An NFT collection of 10,000 Wall Street bulls sold out in 32 minutes when it was launched in October. The collection has become a way for investors to mint their membership in a retail-trading community. Now, the collection's creators are adding a way for retail traders to add an extra layer of risk to their NFTs. Oil painter Cam Rackam watched in awe as his collection of 10,000 Wall Street bull... The State of NFTs: Sales, PFPs, Financialization, and More

Par Laurence Smith sur [Consensys.net](https://consensys.net) le 8 déc. 2021

A version of this article was first published in the ConsenSys Web3 Q3 2021 Report. Check out the full report to learn more about Web3 and the DeFi economy, NFTs, L2s, the Metaverse, and more. 2021 has without a doubt been the year of the non-fungible token, also known as NFTs. As we round out this year, let's take a look at the state of Web3 in the previous quarter. From the advent of novel... [Lire la suite](#)

Seven Trends at the Frontier of Blockchain Banking

Sur [Bcg.com](https://bcg.com) le 2 déc. 2021

Blockchain and other distributed ledgers go far beyond cryptocurrencies. They are becoming core banking activities and offerings. These top seven DLT trends make the leading-edge possibilities accessible. Cryptocurrencies such as Bitcoin and Ethereum, which emerged after the 2008 financial crisis, have grown increasingly popular as investment alternatives. Still, the impact of the underlying... Updated Guidance for a Risk-Based Approach to Virtual Assets and Virtual Asset Service Providers

Sur [Fatf-gafi.org](https://fatf-gafi.org) le 28 oct. 2021

This guidance will help countries and VASPs (Virtual Assets and Virtual Asset Service Providers) understand their anti-money laundering and counter-terrorist financing obligations, and effectively implement the FATF's requirements as they apply to this sector. The guidance provides relevant examples and potential solutions to implementation obstacles. [Lire la suite](#)

The Web3 Economy

Sur [Consensys.net](#) le 29 sept. 2021

Why Web3? This quarter, we are doing things a little differently by covering the major trends in Web3, not just DeFi. As we've written in previous reports, the major innovation of DeFi is that programs are collectively owned and decentralized. Once smart contracts are deployed, they execute as written without the need of an intermediary. This has opened up a whole world of decentralized financial... [Lire la suite](#)

Security Token Market Shows Signs of Resurgence

Par Damanick Dantes sur [Coindesk.com](#) le 14 sept. 2021

If so, more private companies will bypass traditional initial public offerings (IPO) and instead use blockchain technology to digitize the capital-raising process. Some in the industry now go so far as to predict a sixfold increase in the total dollars raised using such funding methods over the next four years. While this niche failed to live up to the hype of the 2017-2018 cryptocurrency boom,... [Lire la suite](#)

Wash Trading and safe trading practices guide

Par besancia sur [Nonfungible.com](#) le 25 août 2021

What are the questions to ask yourself before buying an NFT? How to recognize suspicious practices in the ecosystem? Introduction Whether you are a veteran or a newcomer to the world of NFTs, there are a few project launches or even some activities that must have seemed strange to you at times. Assets exchanged many times at extraordinary prices between two portfolios, a feeling of buying pressure...

DAO Landscape

Sur [Coopahtroopa.mirror.xyz](#) le 23 juin 2021

DAOs have taken center stage. Ever since 14% of the entire ETH supply was locked in The DAO in early 2016, we've spent the last five years distilling what it means to coordinate digital working groups. DAOs are internet communities with a shared cap table and bank account. Members work together to create, distribute and capture value relative to a shared mission. Ownership shares economic, social... [Lire la suite](#)

The Father Of The Web Is Selling The Source Code As An NFT

Par Josie Fischels sur [Npr.org](#) le 17 juin 2021

Ever thought about what it would be like to own the World Wide Web? Now you sort of can — well, a digital representation of its source code anyway. Next week, British computer scientist Sir Tim Berners-Lee, dubbed the "Father of the Web" will auction the original source code for the World Wide Web as an NFT. The work includes the original archive of dated and time-stamped files from 1990 and 1991,... [Lire la suite](#)
